REFERENCE: PR DOCKET NO. 92-235

Dear Ms. Searcy:

The subject of Spectrum Refarming is a very controversial issue. If passed as proposed I believe this will have a serious impact on Public Safety Departments. Not only my department, but others as well. The Spectrum Refarming concerns me in the area of officer safety, citizen safety and financial issues.

I understand that large metropolitan areas are in need of additional frequencies. However, the rural area I live and work in is not effected by those problems. Our radio systems work fairly well without any significant interference.

I propose that the FCC move slowly in the area of Spectrum Refarming and take into consideration the full impact an immediate change would have on government entities. the financial burden would be great if not overwhelming. Possibly an approach of changes only in the area where there is a major problem could be initiated and slowly move towards the goal allowing the strain on financial resources to be lessened.

Respectively Submitted,

Dan Miller  
Captain Patrol/Emergency Management Coordinator
